

CS 440 Meeting Minutes

Group 24, Date: Oct 29, 2022, Time: 30:00, Duration: 80 mins

Present, on time: Milind Kurma, Luke Kim, Punit Malpani, Sharmisha Parvathaneni

Present, not on time: None

Absent: None

Synopsis:

In this meeting, we discussed finalizing the coding project. Milind is responsible for advanced search and Luke will integrate the model. The new problem is that the file is too big for the application and we need to find a way to make it feasible to our application.

In terms of documentation project, we divided the work to meet the deadline. Punit and Luke finalize the report, and Sharmisha finished the documentation summary.

Recent Accomplishments:

This week, we mainly focus on Milind's work on advanced search. We are ready to implement the machine learning file into our project. Also, we finished the document project report and summary.

Current Individual Activities:

Luke and Milind will integrate the machine learning model into the application. Sharmisha and Punit will create description for the database to present to the user. Luke creates UI for advanced search and other database models with Punit and Sharmisha.

Individual Action Items:

Milind will provide the working Python test code for the machine learning model.

Based on the testing file, Luke will implement the model to the application creating forms.

Sharmisha will create database for the result description and other services related to the implementation.

Punit will join Luke to improve the advanced search creating required Database models.
